

The forkawesome package^{*}

Fork Awesome Project[†](The font)
Marcel Krüger[‡](The L^AT_EX package)

July 9, 2018

This package provides L^AT_EX support for Fork Awesome, a fork of Font Awesome v4.
To use Fork Awesome icons in your document, include the package with

```
\usepackage{fontawesome5}
```

For every icon a macro is provided: Just use the official icon names converted to Camel-Case with the prefix `\fa`. For example to use the `file-photo-o` icon, use `\faFilePhotoO`.

Every icon can also be accessed with `\faicon{the-icon-name}`.

Example

```
...
\usepackage{forkawesome}
...
\begin{document}
...
Two icons: \faFilePhotoO~and \faFile.\
Alternative syntax: \faicon{file-photo-o}~\faicon{file}.
...
\end{document}
```

Two icons:  and .

Alternative syntax:  .

Bugs

For bug reports and feature requests, write to `tex@2krueger.de`.

List of icons

^{*}This document corresponds to forkawesome version 1.1.0, dated 2018/07/09
